

Front End Explain :

by creating command npm start

the user 'll be redirected to the welcome page with end-point '/'

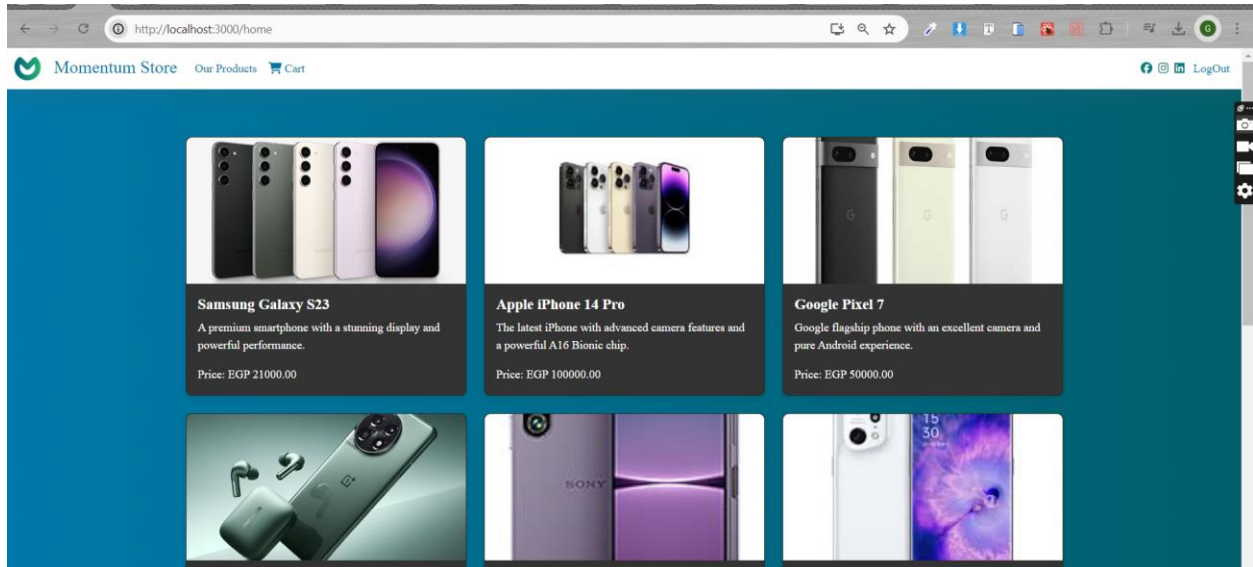

from this end point the user can be redirected to login page ('/login') or register page ('/register')

A screenshot of the Momentum Store registration page. The browser's address bar shows 'http://localhost:3000/register'. The page has a teal header with the 'Momentum Store' logo and 'Login Register' links. The main content area is teal and contains a registration form with the following fields: 'UserName' (containing 'Gmail17'), 'Email' (containing 'eng.gamalsobhi@gmail.com'), 'Password' (masked with dots), and 'Confirm Password' (masked with dots). A green 'Register' button is located below the form. A vertical teal bar on the right side contains a settings gear icon.

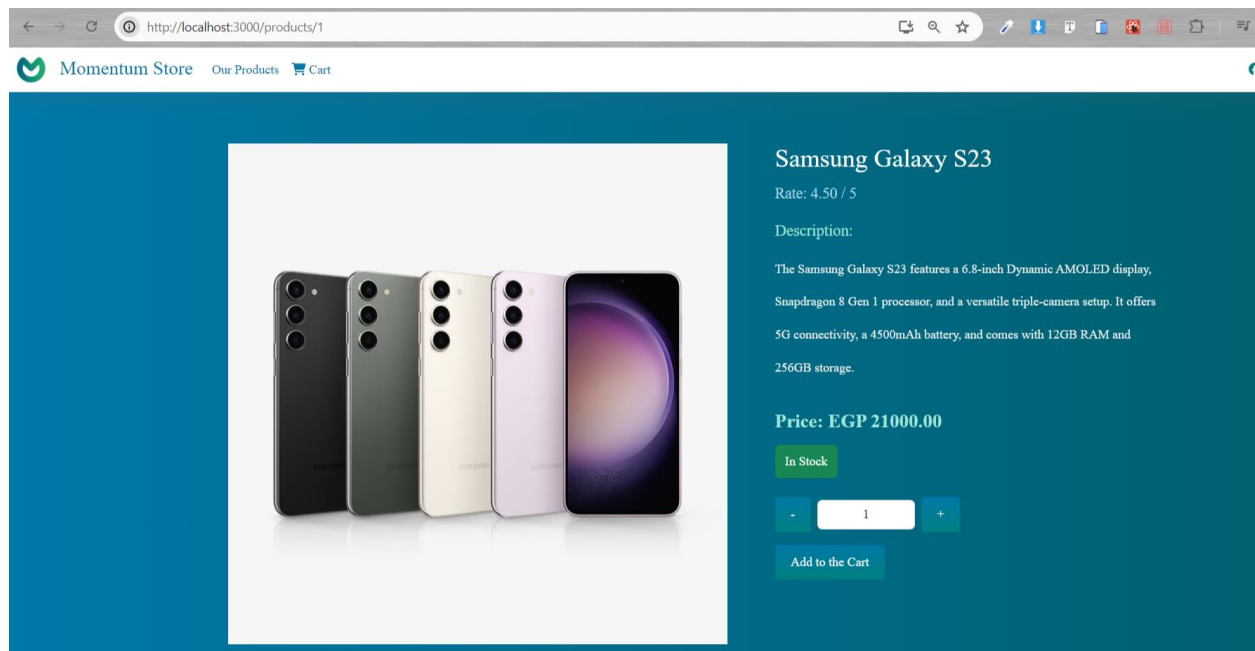

After Registration he 'll be redirected to login page ('/login')

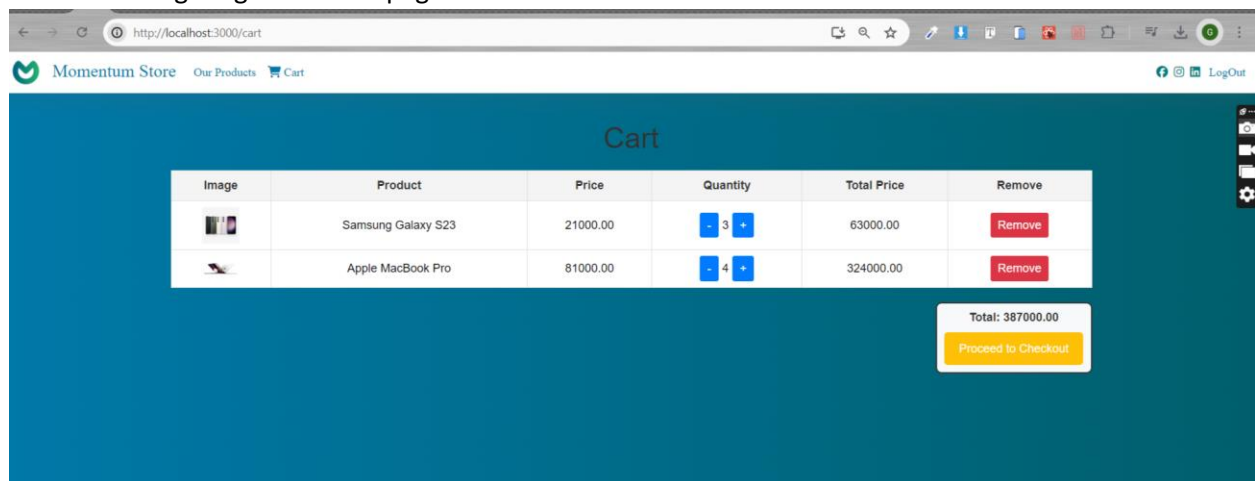

After Logging in he 'll be redirected to Home Page('/Home')

From where he can see all the products and can choose any product to see its details

From the details page he can add the item by the quantity he need to the cart and after navigating to the cart page he 'll found the item he added

if he changed his mind and decided to remove the items he can do that by clicking on remove button

After the decision of buying the items he can click proceed to checkout page

Momentum Store Our Products  Cart    LogOut
